

# The Touch of Healing Therapy Dogs

## Health Requirements

- All Dogs must be one (1) year of age at testing.
- All Dogs must have an **annual** check up from their veterinarian and a signed health form and accompanying paperwork on file.
- Dogs must be in good health: no contagious diseases, obvious injuries or odors, and of appropriate weight.
- The Rabies vaccine must be a current one-year **OR** three-year—**IF** rabies cannot be performed due to health risks, a written explanation from a veterinarian must accompany the health form and a current titer (within one year) must be performed and a copy must accompany the health form.
- A Distemper/Parvo vaccine must be a current, one-year **OR** three-year, **OR** current titers (within one year) must be provided. **IF** the titers are not adequate, then a distemper/parvo booster would be required.
- Fecal test must be performed annually.
- Other vaccines such as Lepto and Bordetella are recommended, but not required—consult your veterinarian.
- Heartworm preventative with the intestinal parasite prevention and flea and tick preventatives are **strongly** recommended.
